Collins RoadMap

Profile

I am a passionate and dedicated Computer Science developer with a stack of
development languages in my belt over the past seven (7) years, some of my
most notable works are the creation of a flutter package for HarperDB.INC, Designing of a web responsive framework like
bootstrap called Collicle, A machine learning android Application that extracts
words from pictures, An offline state-city picker for android apps using json
document. I have also attended virtual workshops for various programming
language and taken courses online to improve my development stack
